# POPULAR ELECTRONICS

PORTLAND PLACE, BOULDER, COLORADO 80302

Dear Subscriber:

Exciting things are happening in the world of electronics!

- \* Short-wave listening is booming. As Americans become disenchanted with "canned" newscasts they are tuning the SW bands to listen in on Peking, Hanoi, Moscow, Paris, etc. POPULAR ELECTRONICS publishes more details on when and where to listen than any other electronics magazine.
- \* Integrated circuits -- the magic name for tiny chips of silicon that are complete radio circuits in themselves. Some of the most exciting developments in electronics involve the use of IC's. You'll see more about how IC's will affect you in future issues of POPULAR ELECTRONICS. Within the foreseeable future ... a home-brew digital computer using IC's.
- \* Hi-fi has gone psychedelic -- well maybe not quite, but color organs are now the "in" thing. Later this year, POPULAR ELECTRONICS will explore some unusual uses of color organs -- restful, startling, amusing and even multi-dimensional.

No doubt about it -- the future of electronics holds some dazzling surprises! And you'll be in on every thrilling one of them ... will be, that is, if you take this opportunity -- now -- to renew your subscription to POPULAR ELECTRONICS, because ...

THE ISSUE YOU RECEIVE IN A FEW DAYS WILL BE YOUR LAST!

Unless we hear from you right away, you may miss an issue between subscriptions. You'll also miss the chance to renew at a special reduced rate (as you were able to do when you originally subscribed to POPULAR ELECTRONICS).

A full 36 months for only \$8.98 (1 year is regularly \$5!)

Just check and mail the enclosed renewal form in the pre-addressed envelope provided. Send no money now unless you prefer. But ... if you do include payment now -- saving us billing costs -- we'll add two extra months to your subscription as a BONUS! 38 issues in all, at less than the regular cost of 24 issues -- the equivalent of over 14 issues FREE! Mail your renewal today.

Sincerely,

Walter S. Mills, Jr.  
Vice President and  
Circulation Director
